

HEAVY CONVEYOR BELTS

Modular heavy series under construction that can be loaded on a container

Heavy series in the pre-assembly phase, this type adopts self-cleaning tracks

Heavy series in the pre-testing phase

All FGM**Tech** Heavy conveyor belts, although based on standard construction specifications, are designed and built upon the customer's request, thus allowing to identify the type, the size as well as the inclination that are more suitable for the use context.

Detail of the tightening system

The **FGM**Tech** Heavy Conveyor Belts** are machines designed and manufactured to be used in multiple fields of application. In fact, thanks to the experiences in the sector of industrial transport and handling, the company has identified and integrated into its own products a series of tested characteristics that allow Heavy conveyor belts to meet all the user's needs.

Medium series under construction

Medium series during pre-assembly

The design philosophy that characterizes FGM**Tech**, based on modularity, practicality, product integrability and constant reliability, allows you to create products easy to maintain and/or re-evaluate over time in alternative contexts. In fact, every component of the Heavy Conveyor Belt becomes automatically a spare part that can be easily replaced.

Medium/heavy series during installation

Medium series during pre-assembly

Medium series with heavy belt plus rubber belt and profiles

Every Heavy conveyor belt can be provided with integral Heavy belt or with heavy belts plus casing with rubber belt, starting from a minimum width up to larger widths.

All the **FGM**Tech** Heavy Conveyor Belts** comply with the current **Machinery Directives** and are supplied with Identification Plate and Use and Maintenance Manual complete with **CE** marking
