

## Mod. *TL* LOADING HOPPERS

Mod. *TL* loading hopper with a capacity of 5 m<sup>3</sup>.

Mod. *TL* loading hopper with a capacity of 2 m<sup>3</sup>.

Inner detail of the Mod. *TL* loading hopper

Mod. *TL* Loading Hoppers are designed and built to satisfy the feeding of lines that process medium-light materials without the need for large volumes. This hopper model is mainly used for the feeding of screening and manual sorting systems where there is the constant presence of the operator in charge of loading operations. The Mod. *TL* Loading Hopper is manufactured and customised according to the customer's request in order to completely meet the production needs of the materials processed.

## Mod. *TP* LOADING HOPPERS

Mod. *TP* Loading Hoppers are manufactured to ensure practicality of use and duration over time to every line treating heavy materials. This hopper model can be supplied with different capacities and according to the type of material to treat it can be combined with the mod. **NB Conveyor Belts**, the **Heavy Conveyor Belts** and with any other conveyor owned by the customer. Normally, this type of hoppers have a maximum width and height that allow to ship them almost completely assembled in standard containers; in addition, if needed, they can be transported disassembled since they are dismountable.

All the **FGMTech Loading Hoppers** comply with the current **Machinery Directive** and are supplied with Identification Plate, Use and Maintenance Manual with **CE** marking
